

UDC Edition Workgroup (2.11.2020) - Meeting plan according to Agenda

1. Welcome and introduction

2. The Consortium's UDC Edition Workgroup

Our concern here is:

- presence of UDC editions with respect to geography/language
- perceived need/demand for UDC edition
- issues with publishing licences and costs
- quality of support for libraries and other UDC users in various regions on the world
- reaching or finding funding bodies / making the management staff understand the need for UDC

Then we are going to go through different types of editions as follows

- summarizing what is known as being the achievements/potentials/issues
- each of you working on this particular type of edition will report about situation for your particular language
- others will be invited to comment and suggest
- we will conclude by deciding whether we need a separate meeting focused on this specific issue and other colleagues we need to include in the discussion

3. Abridged UDC Edition

4. Complete editions (MRF based editions)

5. UDC Summary

6. Summarize main issues

7. Propose a meetings plan
