PUBLIC LIBRARIES IN 1999

Discussion of Selected Aspects

After 25 years the 1999 "Public Libraries in Figures" yearbook resumes the discussion of public libraries based upon their new three-level structure, in which the number of voivodship libraries went down from 49 to 18 and the powiat (county) libraries were reactivated. These changes were of fundamental importance for the operation of the public libraries' network, and also for the data grouping in the present publication. The set of data concerning new voivodships is approximately compatible with their structure in the previous print-on-paper yearbooks, and covers the range enabling data comparability. In the powiat cross section the set of data and indices covers all information we obtained from the GUS Central Statistical Office for 1999.

The year 1999 is admittedly the first year of the operation of public libraries in the newly established powiats (counties), but as a matter of fact it was a year when these middle-level libraries were just being organized by the powiat local governments. Thus the data on powiat libraries cover only 87 libraries. Since the year 1999 was untypical in terms of library statistics – given that it was the first year of the new three-level structure – the authors gave up ranking analyses that made an essential component of the comparative material in the previous years.

Over the next years the gradually expanding range of the GUS gathered data on the powiats enabled to make these data increasingly comparable with the voivodship cross section. We inform about the changes in the data structure in subsequent yearbooks.

The two-level public libraries' structure period that lasted nearly a quarter of a century (1975-1998) saw many important changes in the network's size and, indeed, in its structure. At the beginning of this period the network covered 8, 974 libraries and branches, and over 29, 000 so-called library points, whereas towards its end the number of libraries and branches went up by about 2%, whilst the number of library points dropped by 89%. The most intensive changes occurred during the transition period of the early 1990s. The changes of the transition period need to be linked with the fact that since that moment public libraries have fallen within the competence of local governments. Also the transition period brought developments that had previously

taken place to a minor extent (library mergers) or sporadically (mass-scale library closures).

The country's socio-economic transformation clearly divides the discussed period into two different parts. From 1975 to 1989 the state's patronage of the institutions of culture, and the state funds approved for their activity (since 1981 by the National Fund of Culture) ensured relative stabilization for public libraries, owing to which the number of libraries and branches reached a record figure of 10, 313 entities. The transformation of the system reversed the situation of libraries after 1989. From that year until the end of the discussed period the number of library establishments went down by 1, 146, i. e. 11 %. The network reduction rate since 1989 averaged 1.2 % per annum. The peak reduction was registered in 1991-1993. Later on the decline rate slowed down, however, in 1997 and in 1999 it rose again to the level of the early years of the decade.

As a result of the 1989-1999 social processes, the public libraries' network of 1999 shranked to the level slightly below that of the period immediately after the previous administrative reform (in 1976 the statistics recorded 9, 060 libraries and branches). In 1999 the public libraries' network consisted of 9, 046 libraries and branches. Thus the total number went down by 121 units (1.3 %) compared to 1998 (9,167). The lower number of units in 1999 resulted from the drop in the number of branches by 162 (including 15 for children and young people) combined with the number of libraries increased by 41. The increased number of libraries mainly results from renaming some branches as libraries. It is also a direct consequence of the ever stronger tendency to merge library branches and school libraries, which are given the name of a public and school library. The number of such merged units rose by as much as 102 (51%) compared to 1998. The average number of inhabitants per one library grew in 1999 to 4, 273.

In 1999 the number of library points dropped by a yet another several hundred units (exactly by 463, i. e. 14%) to a level of 2, 870. Also the number of the library points' users went down to 213, 026 (i. e. 0.6 % of the country's population). The average number of users per one library point was 74, i. e. rose by 2 compared to the year before. Library points' users borrowed 2, 725, 991 volumes, i. e. nearly 257,000 less than in 1998. The number of borrowed items per one library point grew, however, from 895 to 949 volumes.

The end of 1999 public libraries' collections reached 135, 378, 773 volumes (excluding rare collections), i. e. the number went down by 250, 950 (0.2 %) compared to the year before. The 1999 withdrawals (losses/disposal) reached 3, 495, 016 volumes, thus in absolute terms they went down only by about 0.5 million compared to 1998. There was also a slight decline in the level of withdrawals per number of inhabitants (9 volumes per 100 inhabitants).

In the discussed period the libraries purchased only 2, 183, 371 volumes of books (serials and rare collections excluded), i. e. as much as 390, 243 volumes less (15%) than the year before. The new titles purchase index went

down in 1999 to 5.6 volumes per 100 inhabitants (in 1998 it reached 6.7 volumes). The central- and local government-funded book purchase expenditures reached 34,617,288 PLZ, i. e. the expended funds fell by 990,703 PLZ (2.8%) compared to 1998. The expenditures per one book averaged 15.85 PLZ (up by 14.5% compared to 1998). The book purchase expenditures in public libraries per one inhabitant reached 0.9 PLZ.

In 1999 public libraries offered 2,697,224 registered units of audio-visual materials, i. e. the resource grew by 62,882 units (2.4%) compared to 1998. In total, the on-site access and loans of audiovisual materials in 1999 covered over 4,332,000 (ca. 6% less than in 1998) – the loans only accounted for 4,087,000 registered units of audio-visual materials. Loans, chiefly of VHS cassettes, music cassettes and the so-called talking books, accounted for 94% of access services. Together the audiovisual materials made up 1.9 % of the public libraries' collections, whereas the access services in the audiovisual materials category declined slightly to only 2.3% of all access services.

The public library users in Poland (inclusive of branches and library points) in 1999 accounted for 19% of Poland's population. The registered number of users was 7,331,957, i. e. 17,864 more than in 1998. In percentage terms that was only a 0.2% growth, six times lower than in 1998 compared to 1997. The number of users in urban areas went up by 40,465 (0.8% of this category in 1998), whereas in rural areas it went down by 22,601 (1.1% of rural users in 1998). In the latter figure as much as 70% (15,459 persons) is made up of users, who borrowed books from library points in 1998. Thus almost three thirds of the decline in the number of users in rural areas results from library point closures.

In 1999 all public libraries, branches and library points borrowed 153,035,562 registered units of books, serials and special collections, i. e. the figure went down by 3,403,172 (2.2%) compared to the year before. The number of loans per 100 inhabitants dropped to 396, i. e. 9 loans less than the year before. Also the annual index of the number of loans per 1 user fell from 21.4 in 1998 to 20.9 in 1999. The slow, but steady growth of both these parametres since 1992 slowed down in 1995-1996, and it broke down in 1997. 1999 was the third year in a row of worrying regression in library user activity.

In 1999 public libraries offered 109,507 reading room seats, i. e. 298 seats (0.3%) more than in 1998. In rural libraries the number of seats went down by 40. In total 37,197,943 volumes of books and serials were accessed on-site (2,145,684 volumes more than the year before, i. e. a 6.1% rise).

The public library (office) space in 1999 grew to 910,236 sqm, i. e. by 10,716 sqm (1.2%) compared to 1998. The average space per one library institution at the municipality level, inclusive of branches for adults, was 101 sqm. The size of branches for children and young people grew to 92.7 sqm and was slightly bigger than the year before (91.3 sqm). In towns the average size of a library entity (excluding voivodship and powiat libraries, but inclusive of large, municipal libraries), was ca. 158 sqm; in rural areas – 57 sqm.

For the third time in a row the public library statistics recorded the growing

number of public librarians from 17, 946 in 1998 to 18, 089 in 1999 (by 143 persons, i. e. 0.8%). Also in rural areas the employment level grew to 7, 114 by 317 (4.7%). The number of staff with university/college-level education went up from 2, 513 in 1998 to 2, 717 in 1999 (204 persons, i. e. 8%). Interestingly, the share of librarians with secondary-level library education dropped from 8, 941 in 1998 to 8, 813 in 1999 (by 128 persons, i. e. 1.4%). The share of staff with library qualifications still accounted for 62% of all public library personnel. The average number of users per one librarian dropped to 405 (3 persons down, i. e. 0.7% down than the year before), whereas the loans per one librarian dropped to 8, 460 registered units (by 2.9%).

The number of automated libraries reached 685, i. e. 7.6%. Out of the total number of 2, 891 microcomputers and terminals, only 554 (less than one fifth) were accessible to users as terminals, whereas the rest were for staff use only (including administrative staff). The automated libraries offered access to 1,761 databases of their own (2.5 databases per one library), of which 1, 133 (64%) were automated catalogues of their holdings. One average database contained ca. 16, 600 thousand descriptions (logical records), and a catalogue database – 9.5 thousand.

In the discussed year the number of closures or library mergers was high and reached a previously unnoted level. The public library network's instability was linked with the unstable situation of local governments, particularly in the area of funding. The hasty decisions to economize on libraries unfortunately find justification in the drastically small local government budgets. In the long run, however, such measures have an adverse impact on the much needed reforms for the sake of which they are undertaken (e. g. the education system reform, particularly in rural areas, will not succeed without well-organized and efficient public libraries). The 1999 level of funds approved for new book purchases in the order of less than 1 PLZ per one inhabitant is simply embarrassingly low, nowhere near the level of new book expenditures not only in the countries of the European Union, but also in the Czech Republic, Latvia or Slovenia.

In this situation some form of intervention of the central authorities responsible for culture and education seemed indispensable. The proportion of public library expenditure in the central budget is usually relatively low, whereas the long-term social effects caused by underfinancing of public libraries might be serious and permanent.

Summary schedule of situation and activity of the public library network 1999

VOIVODSHIPS IN A RANGE
by voivodship administrative order

Table VIII

**Voivodships in order of the standard score index
of means and the organization base**

	rank place at prev. year	average stand. score
1. zachodniopomorskie	— *	1,04
2. podkarpackie	—	1,01
3. lubuskie	—	0,98
4. opolskie	—	0,98
5. warmińsko-mazurskie	—	0,88
6. dolnośląskie	—	0,86
7. lubelskie	—	0,80
8. wielkopolskie	—	0,78
9. kujawsko-pomorskie	—	0,74
10. mazowieckie	—	0,73
11. małopolskie	—	0,71
12. łódzkie	—	0,70
13. świętokrzyskie	—	0,70
14. podlaskie	—	0,69
15. śląskie	—	0,67
16. pomorskie	—	0,53

* Lack of data for individual voivodships results from the new administrative division of the country introduced in 1999.

The index of the material-organizational base covers 5 indices by voivodships, shown in the order of their named values in detailed tables VIII/1 to VIII/5 (in terms of content they constitute equivalents of coefficients given in the administrative order of voivodships in table 8).

The index value is in the arithmetical sense a simple arithmetical mean value of indices standardized for each voivodship, calculated according to the rules given below from table VIII/1 to VIII/5.

The standardized index is a quotient of the named value by an arithmetic average value of a given named distribution, calculated for each voivodship. Solely with reference to table VIII/1 each obtained result was still subtracted from 1, to make the formal direction of the standardized index compatible with its content (the „number of inhabitants per one library entity” index needs to be interpreted according to „the more the worse” rule, thus the „subject-related” and numerical directions of the index must be divergent). Referring to the remaining indices in this index the growth of the formal value is convergent with the subject-related value („the more the better” rule).

Table VIII/1

Voivodships in order of the population per 1 library or 1 branch

	population	standard score
1. podkarpackie	2 953	0,30
2. opolskie	3 220	0,23
3. lubelskie	3 417	0,19
4. lubuskie	3 708	0,12
5. warmińsko-mazurskie	3 887	0,08
6. małopolskie	4 084	0,03
7. świętokrzyskie	4 147	0,02
8. dolnośląskie	4 260	-0,01
9. kujawsko-pomorskie	4 279	-0,01
10. zachodniopomorskie	4 279	-0,01
11. łódzkie	4 356	-0,03
12. wielkopolskie	4 421	-0,05
13. podlaskie	4 529	-0,07
14. mazowieckie	4 668	-0,11
15. śląskie	5 561	-0,32
16. pomorskie	5 784	-0,37

mean 4 222

The standardized index in col. 3 of this table constitutes a difference between one and the value of the quotient of the named index for a given voivodship by the arithmetical mean value of the distribution of this index. The operation of subtracting the value of the quotient from one results from the need to obtain opposite directions of the subject-related and the arithmetical index value.

Table VIII/2

Voivodships in order of the library space (m^2) per 100 population

	space	standard score
1. zachodniopomorskie	3,81	1,56
2. lubuskie	3,15	1,29
3. opolskie	2,83	1,16
4. warmińsko-mazurskie	2,72	1,11
5. dolnośląskie	2,68	1,10
6. podkarpackie	2,64	1,08
7. śląskie	2,39	0,97
8. wielkopolskie	2,34	0,96
9. kujawsko-pomorskie	2,21	0,90

13. małopolskie	—	1,09
14. dolnośląskie	—	1,11
15. pomorskie	—	1,18
16. śląskie	—	1,27

* Lack of data for individual voivodships results from the new administrative division of the country introduced in 1999.

The service burden index covers 5 indices by voivodships, shown in the decreasing order of their named values in detailed tables from IX/1 to IX/5 (in terms of content they are equivalents of the coefficients given in the administrative order of the voivodships in table 9).

The index value is in the arithmetical sense a simple mean value of indices standardized for each voivodship, calculated according to the rules given below from table IX/1 to IX/5.

The standardized index is a quotient of the named value by an arithmetic average value of a given named distribution, calculated for each voivodship.

In all indices within this index a decreasing direction was adopted, according to „the more, the worse” rule (a greater burden).

Table IX/1

**Voivodships in order of number of readers
per 1 library or 1 branch**

	readers	standard score
1. opolskie	563	0,71
2. podkarpackie	590	0,74
3. świętokrzyskie	686	0,86
4. lubelskie	693	0,87
5. podlaskie	735	0,92
6. kujawsko-pomorskie	750	0,94
7. lubuskie	750	0,94
8. mazowieckie	769	0,97
9. łódzkie	786	0,99
10. warmińsko-mazurskie	792	1,00
11. małopolskie	796	1,00
12. wielkopolskie	820	1,03
13. zachodniopomorskie	887	1,12
14. dolnośląskie	945	1,19
15. pomorskie	1 001	1,26
16. śląskie	1 154	1,45

mean 795

The standardized index in col. 3 of this table is a quotient of the named value by an arithmetic average value of a given named distribution, calculated for each voivodship.

Table IX/2

**Voivodships in order of number of readers
per 1 m² of the library space**

	readers	standard score
1. zachodniopomorskie	5,4	0,69
2. opolskie	6,2	0,78
3. lubuskie	6,4	0,81
4. warmińsko-mazurskie	7,5	0,95
5. podkarpackie	7,6	0,95

8. świętokrzyskie	314	0,91
9. łódzkie	333	0,96
10. dolnośląskie	336	0,97
11. warmińsko-mazurskie	339	0,98
12. mazowieckie	344	0,99
13. lubuskie	424	1,22
14. śląskie	467	1,35
15. zachodniopomorskie	491	1,42
16. pomorskie	691	1,99

mean 347

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table X

**Voivodships in order of the standard score index
of effectiveness of library activity**

	rank place at prev. year	average stand. score
1. lubuskie	– *	1,20
2. dolnośląskie	–	1,18
3. zachodniopomorskie	–	1,16
4. śląskie	–	1,12
5. pomorskie	–	1,05
6. warmińsko-mazurskie	–	1,02
7. podkarpackie	–	0,97
8. lubelskie	–	0,96
9. łódzkie	–	0,95
10. małopolskie	–	0,95
11. wielkopolskie	–	0,95
12. kujawsko-pomorskie	–	0,94
13. mazowieckie	–	0,91
14. opolskie	–	0,90
15. podlaskie	–	0,89
16. świętokrzyskie	–	0,86

* Lack of data for individual voivodships results from the new administrative division of the country introduced in 1999.

The efficiency index covers 5 indices by voivodships, shown in the increasing order of their named values in detailed tables from X/1 to X/5 (in terms of content they are equivalents of the coefficients given in the administrative order of the voivodships in table 10).

The index value is in the arithmetical sense a simple mean value of indices standardized for each voivodship, calculated according to the rules given below from table X/1 to X/5.

The standardized index is a quotient of the named value by an arithmetic average value of a given named distribution, calculated for each voivodship.

Contrary to the „burden” index for all indices within this index an increasing direction was adopted, following „the more the better” rule (a greater „efficiency”).

Table X/1

**Voivodships in order of number of readers
per 100 population**

	readers	standard score
1. dolnośląskie	22,2	1,18
2. śląskie	20,8	1,10
3. zachodniopomorskie	20,7	1,10
4. warmińsko-mazurskie	20,4	1,08
5. lubelskie	20,3	1,07
6. lubuskie	20,2	1,07
7. podkarpackie	20,0	1,06
8. małopolskie	19,5	1,03
9. wielkopolskie	18,6	0,98
10. łódzkie	18,0	0,96
11. kujawsko-pomorskie	17,5	0,93
12. opolskie	17,5	0,93
13. pomorskie	17,3	0,92
14. świętokrzyskie	16,5	0,88
15. mazowieckie	16,5	0,87
16. podlaskie	16,2	0,86

mean 18,9

The standardized index in col. 3 of this table is a quotient of the named value by an arithmetic average value of a given named distribution, calculated for each voivodship.

Table X/2

Voivodships in order of number of loans per 100 population

	loans	standard score
1. dolnośląskie	500	1,29
2. śląskie	458	1,18
3. lubuskie	432	1,11
4. lubelskie	405	1,04
5. zachodniopomorskie	405	1,04
6. wielkopolskie	404	1,04
7. małopolskie	401	1,03
8. warmińsko-mazurskie	394	1,02
9. podkarpackie	391	1,01
10. pomorskie	379	0,98
11. łódzkie	358	0,92
12. kujawsko-pomorskie	356	0,92
13. mazowieckie	347	0,89
14. podlaskie	347	0,89
15. opolskie	326	0,84
16. świętokrzyskie	313	0,80

mean 388

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table X/3

Voivodships in order of number of loans per 1 registered item

	loans	standard score
1. śląskie	1,4	1,30
2. dolnośląskie	1,3	1,24
3. kujawsko-pomorskie	1,3	1,18
4. lubelskie	1,2	1,11
5. lubuskie	1,2	1,09
6. łódzkie	1,1	1,03
7. małopolskie	1,1	1,00
8. mazowieckie	1,0	0,99
9. opolskie	1,0	0,97
10. podkarpackie	1,0	0,95
11. podlaskie	1,0	0,92
12. pomorskie	1,0	0,90
13. świętokrzyskie	0,9	0,87
14. warmińsko-mazurskie	0,9	0,87
15. wielkopolskie	0,9	0,86
16. podlaskie	0,8	0,73

mean 1,1

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table X/4

**Voivodships in order of number of loans in reading rooms
per 100 population**

	loans in reading rooms	standard score
1. zachodniopomorskie	202	1,96
2. lubuskie	176	1,71
3. pomorskie	145	1,41
4. warmińsko-mazurskie	122	1,18
5. dolnośląskie	113	1,10
6. śląskie	97	0,94
7. podkarpackie	92	0,89
8. łódzkie	90	0,87
9. opolskie	89	0,86
10. świętokrzyskie	84	0,81
11. wielkopolskie	82	0,80
12. mazowieckie	82	0,79
13. podlaskie	75	0,73
14. kujawsko-pomorskie	71	0,68
15. małopolskie	68	0,66
16. lubelskie	63	0,61

mean 103

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table X/5

Voivodships in order of number of loans per 1 reader

	loans	standard score
1. dolnośląskie	22,5	1,10
2. śląskie	22,1	1,07
3. pomorskie	21,9	1,07
4. wielkopolskie	21,8	1,06
5. lubuskie	21,4	1,04
6. podlaskie	21,4	1,04
7. mazowieckie	21,1	1,02
8. małopolskie	20,6	1,00
9. kujawsko-pomorskie	20,3	0,99
10. lubelskie	20,0	0,97
11. łódzkie	19,9	0,97
12. podkarpackie	19,5	0,95
13. zachodniopomorskie	19,5	0,95
14. warmińsko-mazurskie	19,4	0,94
15. świętokrzyskie	18,9	0,92
16. opolskie	18,6	0,91

mean 20,6

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.
