PUBLIC LIBRARIES IN 2010

FOREWORD

“Public Libraries in Figures” 2010 is the 40th volume of the series. It contains data that illustrate the current status and condition of Polish public libraries. In this yearbook, while having preserved the previously used principles of statistical analysis, we provide a summary of public library activity in 2010 under new subject headings.

The discussion for 2010, compared to previous year, has been extended by new types of information, though the structure and arrangement of data included in the tables has remained unchanged. We extended the scope of the yearbook by adding access to public library service, public library infrastructure and new activities. We complemented the previous analysis of the employment structure by including data on administration, technical and maintenance staff, and also total employment by full-time equivalents. The new data have been provided only for the discussed year and due to lack of reference data for the previous years, no long-term comparison in the form of multi-year tables is available in this case. This extension of the yearbook’s content represents the first stage of changes resulting from the extension of the Central Statistical Office’s K-03 sheet. The full scope of changes will be covered in the statistical description of public libraries for 2011.

DISCUSSION OF SELECTED ASPECTS

THE NUMBER AND STRUCTURE OF PUBLIC LIBRARIES

NUMBER OF LIBRARIES

According to the Central Statistical Office GUS data, in 2010 the public library network in Poland consisted of 2,605 public libraries and 5,737 library branches (8,342 entities in total). The network’s reduction in quantitative and percentage terms was nearly twice as high as the year

before – it contracted by 50 entities, i. e. 0.6%, compared to previous year. This figure is due to the reduction of the number of both public libraries (by 13) and library branches (by 37). On the average, over the past decade the number of libraries went down by 0.6% of entities each year, and the network contracted by 573 entities, i. e. 6.4% (starting from the breakthrough year of 1989 it contracted by 1,971 entities, i. e. one fifth of its pre-1989 size). Despite this declining trend, the structure of the public library network has not undergone any fundamental change: one third is composed of public libraries and two thirds are library branches (the urban/rural public library ratio has also stabilized likewise). Statistically, one mother library runs two library branches (2.2) – 1.9 in towns and 2.4 in rural areas. The 2010 data indicate a drop in the number of branches that specialize in services for children and young people (from 204 in 2009 to 200 in 2010), whereas the number of branches for children rose from 727 to 740. 2010 was a consecutive year in a row that saw an increase in the number of inhabitants per one service region, i. e. the number of inhabitants per one library or branch. In 2010, this index rose to 4,579 inhabitants (4,548 in 2009).

MERGED STRUCTURES

Nearly one fifth of the public library network is made up of entities merged with other institutions, mostly community centres and school libraries, and sporadically with entities operating outside the culture or education sector. Their number has been systematically going down in the recent years. Their share in the total number of libraries and library branches went down from 19.4% in 2009 to 18.4% in 2010. In total, the number of this type of libraries went down to 1,532 (93, i. e. 5.7% less than in 2009), including 189 public-school libraries/branches, 1,252 entities merged with a community centre or another culture institution and 91 entities operating within institutions outside the culture sector. Most of these libraries are based in rural areas – 84.2% in total, in towns they represent 8.6% of libraries and library branches, in rural areas – 23.4%, and nearly two thirds of the total figure is made up of library branches (976).

LIBRARY POINTS

In 2010, the number of registered library points went down to 1,437, i. e. by 32 entities (2.2%) as against 2009 – it dropped by 11 library points in towns (2.1%) and by 21 library points in rural areas (2.2%). As a result of this declining trend, one library entity in the public library network was

responsible for less than 0.2 of a library point. The location of library points has not changed: nearly two thirds are based in rural areas (64.2%).

ACCESS TO LIBRARY SERVICE

Next to the density of the network within an administrative unit, the elements that impact access to public library service include the adjustment of public library premises to the needs of wheelbound users, adjustments made inside the building and inside the reading rooms for users with various disabilities, library opening hours and a number of physical access-related issues. This is how we construe and present "access to library service" on the basis of the 2010 data.

An important element of accessibility to library services are library opening hours. In 2010, over a half of Poland's public libraries (55.2%) was open 5 days a week, nearly 14% (13.8%) were open 6 days a week, and in each fifth library (18.2%) the working week counted up to 3 days (including 1 day in 1.2% of libraries). Nearly one fourth of library entities was open on Saturdays (22.8%; 1,880), and 0.5% worked on Sundays as well (42).

The exact number of library opening hours varied. The most numerous group of libraries (37.7%) was open from 31 to 40 hours a week. Most urban libraries (42.1%) and 35.5% of rural libraries fell within this range. Every third public library (27.7%) was open up to 20 hours a week (7.0% entities in towns and 38.4% in rural areas). Only 2.3% of the total number of libraries worked over 60 hours a week (2.6% in towns, 2.0% in rural areas).

The public library access index defined as the number of library opening hours per 100 inhabitants reached 0.7 hours countrywide. The index was lower in towns – 0.5 hours, and twice that figure in rural libraries – 1.0 hour¹. In 2010, an average library was open 4.6 days during an "ordinary" working week, i. e. nearly 32² hours a week (5.1 days or 37.4 hours per week in urban areas and 4.3 days or 28.7 hours per week in rural areas).

¹ The index depends on the population size (population density). Therefore, in rural areas it will show higher values, despite the same or comparable opening hours in towns and in rural areas. The same applies to the index defining the number of library opening hours per one user – this index may be higher in a library with a smaller number of registered users. It seems that despite more user-friendly opening hours in urban libraries (longer working hours, work after 16.00 on Saturdays and Sundays) than in rural libraries considering the number of potential (target population) and actual users, the index reflects the workload. It shows less time that librarians in towns may devote to library users and a higher workload.

² By comparison, according to the Analysis of Research Library Operations AFBN, in academic libraries the weekly number of opening hours in 2009 averaged 60.94.

An important aspect of access to public libraries is the adjustment of their opening hours to the needs of users, like for instance providing the possibility to use public libraries in the afternoon, after 16.00. Nearly one-fifth (18.5%) of public library opening hours are after 16.00 (20.4% in urban libraries and 17.2% in rural libraries). Up to 10 hours per week after 16.00 were offered by 87.4% libraries (including up to 5 hours in over a half – 53.9%). Over 10 hours per week were offered by only 12.6%. An average library provided user services after 16.00 nearly 6 (5.9) hours per week (7.6 hours in urban libraries and 5.0 hours in rural libraries).

There is a distinct improvement in access to libraries for persons with reduced mobility. Nonetheless, the rate of change in this case is greatly dependent on the adjustment of public library space. In 2010, over one fourth of library premises (26.6%; 21.2% in 2009) had barrier-free access for the wheelbound; 36.7% in towns (30.2% in 2009) and 21.4% in rural areas (16.4% in 2009). Every seventh library offered infrastructure adjustments inside the building (every fifth in towns; every ninth in rural areas). Less than one percent (0.6%) of places in the reading rooms is adjusted to the needs of the disabled. The situation in this respect fared better in urban libraries (0.8%) than in rural libraries (0.5%).

Another factor that limited access to public library service was the suspension of library activity by the existing libraries. Each year over the past five years over 1% of libraries suspended user services. In 2010 there were 97 such libraries, 7 more compared to previous year, i. e. 1.2% of the total number.

COMPUTERIZATION

The number of computer-equipped libraries and library branches in 2010 went up to 6,948 out of the total number of 8,342 (83.3% versus 73.5% in 2009). Compared to previous year, the figure grew by 781 computer-equipped entities (i. e. 12.7%), which applied especially to branches (growth by 746, i. e. 20.5%). In urban areas, the percentage of computer-equipped libraries rose from 86.4% in 2009 to 91.6% in 2010 which translates into 98 new computerised entities, i. e. a 3.9% growth, whereas in rural areas it rose from 66.7% to 79.0% (growth by 683 entities, i. e. 18.6%). Progress in computerisation applied mostly to the least-equipped entities, namely rural library branches, however the disproportion by the urban/rural and public library/library branch split continued to prevail.

Chiefly main public libraries (98.6%) are computerised or, in fact, possess computer hardware (96.8% in 2009), and, more specifically, 99.6% in towns and 98.0% in rural areas. Only 76.3% of public library branches

offered computer access (62.9% in 2009): 87.4% in towns and 71.1% in rural areas.

In 2010, libraries acquired over 3,000 (3,314) computers (a 10.4% rise compared to a 9.2% rise in 2009). This increased the number of computers in public libraries and their branches to 35,094 computer units. Only one fifth worked as standalone units, whereas 81% worked in library local area networks or LANs of other institutions.

The average index per one computerized entity in 2010 was 5.1 computers which corresponds to 4.2 computers per one entity in the network in general. An average urban public library undergoing computerization owned 8.3 computers, and an average urban library or library branch owned over seven computers – 7.6. In rural areas, these computerization indices were lower: 3.1 and 2.5, respectively. The biggest concentration of computer hardware was found in main public libraries where the average computerization index was 8.9 computers per one library. In library branches, the index showed less than 3 (2.8) computers per one branch. Urban main libraries were best equipped to provide computer-aided services (15.7 computers per one library) as opposed to the most underprivileged rural library branches (1.6 computers per one branch). The computer resources are split between user access and in-house library work, in more or less equal parts. The number of computers that served user access averaged 55.6%. 41.2% of the computers was used for in-house library/bibliographic work and the remaining 3.2% probably served administrative and office functions. In rural libraries, the decisive majority of the computers is either solely assigned to library user access or is shared with librarians (72.7% of the total figure). Urban libraries reported that 44.7% of their computers were accessible to users.

The number of computers used in library/bibliographic work continues to be around 40% of the total number of computers used in libraries. However, in this group there is a shift from acquisitions and cataloguing to user and loan registration.

Due to intensified efforts to provide broadband Internet access in public libraries³, in 2010 94.0% computers used in libraries had the Internet connection (both on the total level and by the urban/rural split), and out of this figure 18,338, i. e. 55.6% was accessible to users; in rural areas:

³ Internetization of public libraries is one of the elements of the long-term programme of the Minister of Culture “Library+” implemented by the Book Institute. The signatories of the programme “Library with TP Internet” are: the Ministry of Culture and National Heritage, Ministry of Home Affairs and Administration, national telecommunications company TP S. A. and Information Society Development Foundation (FRSI).

73.5%, in towns: 44.1%). In total, 79% libraries and library branches had the Internet connection.

In 2010, 1,960 libraries offered online catalogues which accounts for nearly one fourth of the total number of active entities (i. e. 23.5%) and 28.2% of entities declaring possession of computer hardware. This figure shows that libraries are poorly equipped in library software. It is used by 3,983 libraries and library branches, i. e. 57.3% of entities using computers (60.4% in 2009) and less than a half of entities active in that period.

COLLECTIONS

In 2010 Polish public libraries held 133,248,591 monographs and serial volumes (excluding rare/special collections), i. e. 1,019,804 items less (0.8%) than at the end of the previous year. The scale of the regression stayed more or less at the same level as in 2009 (a 0.7% decrease), whereas, unlike the year before, the drop in the size of the holdings, both in absolute and in percentage terms, was greater in urban libraries – by 707,659 volumes, i. e. 0.9% as against 2009, than in rural libraries where the holdings dropped by 312,145 volumes, i. e. 0.6%. In total, the holdings' shrinkage has been reported for the third year in a row, particularly in rural libraries.

On the other hand, with regard to the holdings index, i. e. the number of volumes per 100 inhabitants, the data indicate an equal drop by 3 volumes in all three categories: total, urban and rural. The total holdings index went down from 352 in 2009 to 349 in 2010; in towns its value dropped from 344 volumes to 341 volumes (it had grown systematically until 2009), in rural areas from 365 volumes to 362 volumes (in 2004-2006 it stayed at the level of 378 volumes).

The average collection per one library or branch in 2010 went down to 15,973 volumes, in towns it rose to 28,005 volumes, in rural areas it dropped to 9,796 volumes. The average collection in 2010 reached 26,943 volumes per one public library and in an average branch it shrunk to 10,992 volumes which marked a yet another year of decrease of the collection size in this category.

The new acquisitions in public libraries in 2010 went down to 3,986,223 volumes (less by 245,528 volumes, i. e. 5.8% than in 2009). The incoming publications included new book purchases – 2,711,336 volumes (68.0%), holdings taken over from other libraries – 309,034 volumes (7.8%), and items obtained as gifts, exchange items, deposits – 965,853 volumes (24.2%). New book purchases went down by 149,966 volumes, i. e. 5.2% as against 2009. In rural areas purchases stayed at

the same level as the year before – 1,057,947 volumes of books (23,642 volumes less, i. e. 2.2%, than in 2009); in towns the drop was greater – the purchases went down to 1,653,389 volumes (126,324 volumes less, i. e. 7.1%).

In 2005-2008 the purchase index reached a half of the recommended value (nine volumes and over - both in the total category and by the urban/rural split). In 2009, the purchase index decreased to 7.5 volumes, and in 2010 it fell even more to reach 7.1 volumes per 100 inhabitants. It reached the same value both in towns and in rural areas.

In 2010, public libraries spent 59,179,588 PLN on book purchases (a 2.2% drop as against 2009). The drop in spending affected urban libraries which spent 37,874,774 PLN (a 4.4% drop). In rural libraries spending on new books rose to 21,304,814 PLN (a 1.8% growth). Nevertheless, book purchase spending per one inhabitant and one user continued to show a declining tendency. Public libraries spent 1.55 PLN per one inhabitant (1.63 PLN in towns and 1.43 PLN in rural areas). The spending per 1 public library user does not exceed 10 PLN, in 2010 it went down to 9.1 PLN. In urban libraries it averaged 7.82 PLN, and in rural libraries – 12.85 PLN. The mean price of one purchased book in 2010 rose to 21.83 PLN (in rural libraries to 20.14 PLN, in urban libraries to 22.91 PLN).

The withdrawals in 2010 reached 4,958,172 volumes. This figure was lower by 271,034 volumes than in 2009 (a 5.2% decrease). Also, the relative index of withdrawals went down from 13.7 volumes in 2009 to 13.0 in 2010, both in rural libraries (drop from 14.5 volumes to 13.8 volumes per 100 inhabitants) and in urban libraries (drop from 12.4 volumes to 11.6 volumes).

The index that defines the collection use had remained unchanged since 2007. In 2010 it averaged again less than 1 borrowing per 1 registered item (0.9).

AUDIOVISUAL AND ELECTRONIC COLLECTIONS

At year-end 2010, special collections, including audiovisual and electronic materials, totalled 4,823,441 registered units (3.5% of all public library holdings). The audiovisual and electronic collections themselves made up 2,632,828 registered units (2,483,841 registered units of audiovisual materials and 148,987 registered units of electronic documents), hence 1.3% more than a year ago (2009 saw a 0.9% drop). The increase in this category was registered in all public libraries, as well as in urban libraries (a 1.2% rise) and in rural libraries (a 6.4% rise). This positive

balance is due to a rise in the audiovisual materials' category by 7,315 registered units (i. e. 0.3%) combined with a rise in the electronic documents' category by 27,283 registered units. Nonetheless, the collection development in these categories continues to account for just a small portion of the public library collection development in general. The print-on-paper holdings in 2010 accounted for 96.5% of all public libraries' holdings and the percentage of audiovisual and electronic documents has been in the order of less than 2% for many consecutive years (1.9% in 2010). Audiovisual materials account for 1.8% of the entire holdings, and the share of electronic documents rose to 0.1%. The share of audiovisual materials and electronic documents in the public library holdings' averaged 0.1% in rural libraries and 3.2% in urban libraries.

In 2010, the registered loans and in-house use of audiovisual materials in public libraries dropped by 0.4% (as against a 10.3% rise in 2009); in urban areas it dropped by 0.4% and in rural areas by 3.0% (as against rises of 10.1% and 20.0% in 2009). The situation is quite the reverse with regard to the use of electronic documents. Their loans and in-house use in 2010 grew by 6.0% in all public libraries (as compared to a 7.5% growth in 2009); in urban libraries this index went up by 6.9% and rural libraries reported a slight growth of 3.0% (2009 saw a rise of 9.9% and a fall of 0.3%, respectively).

BORROWERS

In 2010, the number of registered borrowers and users in public libraries went down to 6,501,933 (it dropped by 51,827, or 0.8% compared to previous year). The drop was twice as high as the rise recorded in 2009 (0.4%). The decrease in the number of registered borrowers affected both libraries operating in towns and in rural areas (a drop by 29,870 persons, i. e. 0.6% and 21,957, i. e. 1.3%, respectively). The model of public library use has stabilized: three fourths of borrowers use urban libraries (in 2009 – 74.4%).

It needs to be underlined that the discussed trends apply to the actual physical contact of borrowers with the public libraries and their holdings. The online use of public libraries is much bigger which has changed the picture of public library use and the actual institutional access to reading. The social impact of public libraries in terms of the percentage of public library borrowers went down from 17.2% in 2009 to 17.0% in 2010; in towns it dropped from 20.9% to 20.8% (as opposed to the rise a year ago), whereas in rural areas it had systematically shown a declining tendency for the seventh year in a row: from 11.3% in 2009 to 11.1% in 2010. The services provided by library points were used by

1.6% of all public library borrowers (1.1% in towns, 3.0% in rural areas) and by only 0.27% of Poland's population.

In 2010, the average number of borrowers per one library entity in the "total" category dropped from 781 to 779. In urban areas, it rose from 1,688 to 1,712, and in rural areas it underwent further reduction – this time from 305 to 301. In urban areas this index rose for the second year in a row – this time from 69 to 71 borrowers per one library point. In urban libraries the index reached 103 borrowers and in rural libraries – 53 borrowers per one point.

STRUCTURE OF BORROWERS

The trends in the structure of public library borrowers, or more specifically the flows between age and occupation groups, have remained unchanged since mid 2000s. In 2010, the share of borrowers up to 24 years of age in the "total" category continued to go down (a yet another year of decline). According to the raw data distribution, public library borrowers up to 24 years of age, mostly learning, studying persons or those acquiring additional education, account for nearly 55% (54.9%) of public library borrowers, i. e. 2 percentage points less than the year before. In this figure, the share of borrowers up to 15 years of age continued to represent over one-fourth (25.1%) of all public library users, and the 16-19 and 20-24 groups – 14.1% and 15.7%, respectively.

The data for 2010 show declines in the number of public library borrowers in two social groups: pupils and students, i. e. persons mostly classified under the first three age groups (up to 24 years of age). The sharpest decline of 4.4% affected pupils. The number of student borrowers decreased less – by 1.7%. The remaining categories of the public library clientele – the professionally active borrowers – indicated growth, though it was smaller than the year before.

The analysis of the structure of borrowers by occupation shows that the most numerous group are pupils who accounted for 41.3% of all public library borrowers. The other groups, in the declining order, were "white collars" (18.1%), "the unemployed" (16.6%), and "students" (13.1%). The smallest groups in the reading population were: "other employed" (3.4%), "blue collars" (6.5%) and "farmers" (1.0%).

LOANS

The GUS data for 2010 show that users of public libraries, public library branches and library points borrowed 123,602.0 thousand registered items, including 119,914.7 thousand volumes of books and serials

and 3,687.3 thousand registered items of special collections. The number of registered loans went down by 2,345.4 thousand registered items, i. e. 1.9% as against 2009 (in 2009, loans dropped by 0.3%). The regression in 2010 was due to the comparable drop in percentage terms in both in urban and rural libraries: by 1,648.0 thousand registered units, i. e. 1.8% and 697.5 thousand, i. e. 2.1%, respectively.

The total drop in loans in 2010 is a consequence of a decline in traditional collection borrowing (by 2,515,726 vols., i. e. by 2.1%) in conjunction with increased special collection borrowing by 170,288 registered units, i. e. 4.8%. The increased interest in the special collection was registered both in urban libraries (a 4.9% rise) and in rural libraries (a 3.2% rise), whereas the drop in traditional borrowing was sharper than the year before and similar in percentage terms in both urban and rural libraries (2.0% and 2.1% respectively). Bigger drops were registered in serials – a 4.0% drop in total, a 3.8% drop in urban libraries and a 4.3% drop in rural libraries as compared to lower drops in traditional book borrowing – by 2.0% (both in the total category and by the urban/rural split).

Despite the growing tendency in special collection borrowing, which particularly applies to electronic documents that provide an alternative to traditional public library collections, any structural change in the use of public library collections has not been traced. In 2010, traditional book borrowing accounted for 97.0% of all loans, whereas special collection borrowing reached 3.0% (in 2009, 97.2% and 2.8% respectively). Compared to previous year, the index of loans (including special collections) per 100 inhabitants went down from 330 to 324 registered units. In rural libraries the index continued to decline, falling from 226 in 2009 to 221 in 2010 (by a yet another 5 points, i. e. 2.2% of its 2009 value). The situation in urban libraries was less unequivocal: in the analyzed year the index fell to 390 from 396 in 2009, in 2009 it showed an upward trend, whereas 2008 was again a year of the index's fall.

The index of loans per one borrower developed likewise. In the "total" category, it went down from 19.2 in 2009 to 19.0 registered units per one borrower in 2010; in urban libraries to dropped from 18.9 to 18.7 and in rural areas from 20.0 to 19.9. This shows a declining trend in public library loans which has particularly affected traditional, print-on-paper publications. The loans in all library points did not go beyond 1% of all loans.

A new area for observation of the borrowing intensity in public libraries is an index of borrowings per one hour of public libraries' operation. In the "total" category, borrowings in 2010 (traditional collection plus special collection) reached 473 vol./registered unit per one hour (865 in towns, 211 in rural areas).

IN-HOUSE USE

In 2010, Polish public libraries offered 110,416 reading room seats for in-house use of their collections, i. e. 589 more than the year before (a 0.5% rise). In towns the number of seats went down by 279 (i. e. 0.5%), in rural areas it grew by 868 seats (i. e. 1.6%). The index that defines the average number of public library reading room seats per 100 of Poland's inhabitants has not changed for years – in 2010 it continued to be 0.3 seats.

The year 2010 confirmed the many-years' declining trend in in-house use on the "total" level. In 2010, the total number of registered units accessed on site went down to 29,814,797, which comprised 28,246, 816 volumes of books and serials and 1,567,981 registered units of special collections. The regression in in-house use was twice as high as the year before. The total number of registered units accessed in-house went down by 1,060,903 registered units, i. e. 3.4% as against 2009.

This bottomline figure was due to the in-house use of the traditional collection which went down by 1,141,802 volumes (3.9%, as compared to 1.8% in 2009) in conjunction with the increase in the special collection in-house access by 80,899 registered units, i. e. 5.4% (similar to the previous year's 5.9%).

The situation by the urban/rural split developed likewise: larger decreases in absolute and percentage terms affected urban libraries (a decrease by 948,015, i. e. 3.9%) than rural libraries (a decrease by 112,888, i. e. 1.8%), which was mainly the outcome of the decline in the traditional book collection access, by 4.4% and 1.9% respectively. The special collection access increased by 6.4% in urban reading rooms and by 1.9% in rural reading rooms.

The level of indices that define on-site access has been going down systematically. The access index per one reading room place (including special collections) in 2010 dropped by 11 registered units, i. e. 3.9%, to 270 as against a 2.4% fall in 2009. Another index that dropped in 2010 was the number of accessed items (books, serials and special collections) per 100 inhabitants. Its value dropped from 81 registered items in 2009 to 78 (i. e. a 3.7% fall, as against a 1.2% fall in 2009).

The average on-site access per hour, covering books, serials and special collections, reached 114.1 vols./registered units (224.2 in urban reading rooms and 40.4 in rural reading rooms).

LIBRARY INFRASTRUCTURE AND SPACE

Out of the total number of 8,342 libraries and library branches, only 930 (11.1%) are based in standalone buildings as their solo users. The remaining 7,412 are based in buildings they share with other companies and institutions. Every seventh standalone building used by a public library (15.5% of the total space used by public libraries) is on the national heritage list, with nearly every fourth such building located in urban areas (23.7%) and around 7% in rural areas.

Eight out of 930 standalone buildings used by libraries were built in 2010. If we consider buildings erected after 1990 as recently built, the total number of these is only 88 (9.5%). Over a half of buildings (498; 53.5%) comes from 1945-1989, and one third (37.0%) was built before 1945.

In 2010, according to the GUS data, the increase in public library usable space was evenly distributed, both countrywide and by the urban/rural split. Countrywide, it went up by 20,678 sq. m., i. e. 2.1% as against the previous year, in urban libraries it went up by 12,809 sq. m., i. e. 2.1%, in rural libraries the rise in percentage terms was slightly higher – by 2.3%, i. e. 7,869 sq. m. Due to these changes, in 2010 public libraries had the total space of 987,928 sq. m. at their disposal.

The average space per one library entity has grown systematically from 115.3 sq. m. in 2009 to 118.4 sq. m. in 2010, i. e. by 3.1 sq. m.; in towns from 214.3 sq. m. to 223.3 sq. m. (by 9 sq. m.), in rural areas from 63.3 sq. m. to 64.6 sq. m. (by 1.3 sq. m.). 2010 was a yet another year in a row that showed improvement in terms of library space in the main public libraries: the average space of one library institution (library or library branch) went up from 211.0 sq. m. in 2009 to 218.2 sq. m. in 2010 (by 7.2% compared to previous year); in urban libraries – from 415.2 sq. m. to 425.0 sq. m. (a space increase by 9.8 sq. m.); in rural libraries – from 91.5 sq. m. to 94.3 sq. m. (an increase by 2.8 sq. m.).

In library branches the space increase was smaller: the size of an average branch rose from 71.9 sq. m. to 73.1 sq. m., hence by 1.2 sq. m. Considering the urban/rural split, the library space situation improved in urban branches (an increase from 113.4 sq. m. to 117.1 sq. m. by 3.7 sq. m.) while the size of an average rural branch grew only slightly from 51.1 sq. m. to 52.1 sq. m. (an increase by 1.0 sq. m.). The average size of a branch for children and youth moved up only slightly as well – from 103.7 sq. m. to 104.2 sq. m., i. e. by 0.5 sq. m.

The average number of borrowers per 1 sq. m. in 2010 dropped to 6.6 per 1 sq. m. of library space from 6.8 in 2009. The index went down to 7.7 borrowers in urban libraries (from 7.9) and to 4.7 borrowers in rural libraries (from 4.8).

LIBRARY STAFF

In 2010, according to GUS data, public libraries employed 23,471 persons in total (librarians and administration staff), 16,187 persons out of which worked full-time (69.0%). The employment level in full-time equivalents reached 19,400.31. Urban libraries employed 15,877 persons which represents 14,258.49 in full-time equivalents, including 12,841 persons working full-time (80.9%). Rural libraries employed 7,594 staff (5,141.82 in full-time equivalents), including 3,346 persons working full-time (44.1%).

The total number of librarians employed in public libraries in 2010 dropped to 18,248, i. e. by 198 persons (a 1.1% drop compared to previous year). From 2004 until 2009 this group of staff had grown. The share of librarians in the library staff structure reached 77.7% in total, and 74.2% in towns. In rural libraries, non-librarians represent a minor group and librarians constitute 85.2% of the staff. It follows that mainly large libraries working in an urban environment employ administrative, technical and maintenance staff.

The total staff figures for 2010 are the outcome of the decreased number of librarians in urban libraries (97 librarians less, compared to previous year, i. e. a decline of 0.8% compared to a 2.5% rise in 2009) and in rural libraries (101 librarians less, i. e. a decline of 1.5% compared to a 3.0% rise in 2009).

The average number of librarians per one library institution (library or branch) has not changed much. In 2009 the index went up to 2.2 persons and in 2010 it stayed at the same level. 2010 saw again a minimal growth of this index in urban libraries – up to 4.2 (4.1 in 2009), in rural libraries it was again 1.2, just like in previous years. The average staff index in main libraries did not change when compared to 2009 – in 2010 it stabilized at the level of 4.1 (in towns the value reached 8.1, whereas in rural areas the index “recovered” to go up to 1.7 as in 2008). In library branches the index stayed at the level reached in 2008-2009 (1.3 persons in the “total” category, 2.1 in urban libraries, and 0.9 in rural libraries).

In the analyzed year, public libraries employed 13,706 full-time librarians, i. e. 27 persons more compared to previous year (a 0.2 % rise). The share of full-time librarians in the library staff structure went up from

74.2% in 2009 in the “total” category to 75.1% in 2010. In urban libraries the share of full-time librarians grew from 87.8% in 2009 to 88.9% in 2010 (over the previous years it declined) and in rural libraries it grew likewise (from 49.6% in 2009 to 50.1% in 2010).

In 2010, the share of librarians with tertiary education increased, like in the previous year. Their number grew by 264 persons (3.9%), while the group of librarians with professional secondary education continued to shrink like over the previous years: in 2010 this group decreased by 162 persons, i. e. 2.7%. The group of library employees with no professional qualifications has continued to grow (in 2010 by 300 persons, i. e. 5.2% compared to previous year). On the one hand, this indicates poor protection of access to the profession of a librarian, yet on the other this shows the need for support of library activity by specialists from other fields.

In 2010 employees with library qualifications constituted 70.2% of all public librarians (compared to previous year's 68.9%). In towns this percentage was slightly lower than the year before since it went down to 75.2% (as compared to 75.3% in 2009); in rural areas it was definitely higher – it rose from 57.3% to 61.1%. The share of persons with tertiary education (including those with a bachelor degree) grew from 36.8% in 2009 to 38.7% in 2010, the group of library professionals with secondary education shrunk to 31.5% from 32.1% in 2009, while the staff with no library qualifications went down to 29.8% from 31.1% in 2009. In urban libraries the structure of qualifications broke down as follows: 45.9; 29.2; 24.8; and in rural libraries: 25.4; 35.7; 38.9, respectively.

In 2010, the average number of borrowers per one librarian increased slightly to 356 (1 borrower more compared to previous year). It needs to be underlined that the registered data and indices describe the workload related to borrowing operations.

FINAL COMMENTS

The year 2010 closes the first decade of the 21st century. It was a time of many big changes for public libraries. As a result of this process, not only has the social perception of public libraries changed – they have in fact become modern, friendly and open institutions of culture. Not only has their social image changed, but also the style of their participation in social life. Libraries included in the process of change have consistently aimed at showing their new achievements (and have sought new methods of doing it). As a consequence, more often than not, public libraries are now subjected to confrontation, verification and comparisons. Their

work is set against the whole public library network, libraries of other types or institutions of culture.

One of the proposals for a broad description of the public library activity is a new, extended K-03 form drawn up by a group of experts called to life on the initiative of the Central Statistical Office GUS, the National Library's Book and Reading Institute, and the Ministry of Culture and National Heritage. The analysis for 2010 covered selected aspects of the statistical description related to access to libraries and their infrastructure, library staff in general, and culture popularization, training and publishing activities.

Full changes will only be possible starting from 2011 and due their broad scale, they will not be easy to interpret. The data themselves will not be free of errors which will make their aggregation and interpretation difficult. The fundamental issue to be handled properly shall be public library users. An attempt will be made to register persons using library and information services provided by public libraries in general, without narrowing this category to persons who borrowed at least one item over one year (traditional public library borrowers). The second group of issues introduced in the new statistical description of public libraries shall be the electronic collection development in public libraries and its use (including participation in the creation of digital libraries, databases and repositories, as well as digitalization). This relates to online services, methods of librarians' communication with library users (by means of communicators, websites). An important matter is the possibility of broader registration of data concerning library financing and expenditures (entering incomes by sources of financing and adding expenditures on electronic publications). Equally important is the matter of library staff professional development.

For today's public libraries, providing high quality services has become a vital element of their strategic, marketing and PR activities. The evaluation of library services should take three aspects into account: measurement of functionality indices, evaluation of library services by users and the impact of the library on society and its users. Library functionality indices, and follow-up analyses and comparative studies may serve and be used by public library management, as well as by library founding bodies and the library community.

VOIVODSHIPS
by selected indexes

Table XIII

Voivodships by index of library coverage and operational capacity

	ranking place in prev. year	average stand. score
1. zachodniopomorskie	1	1,02
2. lubuskie	2	0,99
4. podkarpackie	4	0,99
3. opolskie	3	0,96
5. warmińsko-mazurskie	5	0,90
6. dolnośląskie	6	0,85
7. lubelskie	7	0,85
8. mazowieckie	8	0,82
9. wielkopolskie	10	0,80
10. kujawsko-pomorskie	11	0,78
11. podlaskie	12	0,78
12. łódzkie	9	0,77
14. świętokrzyskie	14	0,77
13. śląskie	13	0,75
15. małopolskie	15	0,72
16. pomorskie	16	0,59

Table XIII/1

**Voivodships by number of inhabitants per 1 library
or 1 branch**

	inhabitants	standard score
1. podkarpackie	3 049	0,33
2. opolskie	3 235	0,29
3. lubelskie	3 605	0,21
4. lubuskie	3 919	0,14
5. świętokrzyskie	4 351	0,04
6. małopolskie	4 361	0,04
7. zachodniopomorskie	4 479	0,01
8. dolnośląskie	4 504	0,01
9. warmińsko-mazurskie	4 517	0,00
10. łódzkie	4 534	0,00
11. kujawsko-pomorskie	4 672	-0,03
12. wielkopolskie	4 789	-0,06
13. podlaskie	4 890	-0,08
14. mazowieckie	5 312	-0,17
15. śląskie	5 695	-0,26
16. pomorskie	6 668	-0,47
mean 4 536		

The standardized index in col. 3 of this table constitutes a difference between one and the value of the quotient of the named index for a given voivodship by the mean value of the distribution of this index. The operation of subtracting the value of the quotient from one results from the need to obtain opposite directions of the subject-related and the arithmetical index value change.

Table XIII/2

Voivodships by number of PCs per 1 library or 1 branch

	PCs	standard score
1. warmińsko-mazurskie	5,63	1,33
2. mazowieckie	5,18	1,23
3. pomorskie	4,80	1,14
4. lubuskie	4,49	1,06
5. śląskie	4,47	1,06
6. zachodniopomorskie	4,42	1,05
7. podlaskie	4,32	1,02
8. kujawsko-pomorskie	4,18	0,99
9. dolnośląskie	4,14	0,98
10. łódzkie	4,02	0,95
12. lubelskie	3,96	0,94
11. małopolskie	3,88	0,92
14. świętokrzyskie	3,76	0,89
13. wielkopolskie	3,66	0,87
15. opolskie	3,54	0,84
16. podkarpackie	3,16	0,75

mean 4,23

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XIII/3
Voivodships by library space (in sq. m.) per 100 inhabitants

	space	standard score
1. zachodniopomorskie	4,06	1,51
2. lubuskie	3,55	1,32
3. podkarpackie	3,14	1,17
4. opolskie	2,97	1,11
5. dolnośląskie	2,91	1,08
6. warmińsko-mazurskie	2,82	1,05
7. śląskie	2,73	1,02
8. wielkopolskie	2,52	0,94
9. łódzkie	2,48	0,92
10. lubelskie	2,45	0,91
11. podlaskie	2,41	0,90
12. świętokrzyskie	2,35	0,88
13. kujawsko-pomorskie	2,31	0,86
14. mazowieckie	2,21	0,82
15. małopolskie	2,11	0,79
16. pomorskie	1,90	0,71

mean 2,68

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XIII/4

Voivodships by number of seats per 100 inhabitants

	seats	standard score
1. lubuskie	0,4	1,43
2. zachodniopomorskie	0,4	1,32
3. opolskie	0,4	1,29
4. podkarpackie	0,4	1,26
5. dolnośląskie	0,3	1,11
6. warmińsko-mazurskie	0,3	1,11
7. lubelskie	0,3	1,01
8. kujawsko-pomorskie	0,3	0,95
9. łódzkie	0,3	0,93
10. wielkopolskie	0,3	0,92
11. świętokrzyskie	0,3	0,88
12. podlaskie	0,3	0,82
13. małopolskie	0,2	0,81
14. mazowieckie	0,2	0,78
15. śląskie	0,2	0,73
16. pomorskie	0,2	0,65
mean 0,3		

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XIII/5

Voivodships by number of volumes per 100 inhabitants

	volumes	standard score
1. podkarpackie	419	1,18
2. zachodniopomorskie	417	1,17
3. opolskie	398	1,12
4. podlaskie	390	1,10
5. lubuskie	379	1,07
6. kujawsko-pomorskie	368	1,03
7. śląskie	361	1,01
8. warmińsko-mazurskie	357	1,00
9. łódzkie	353	0,99
10. świętokrzyskie	351	0,99
11. wielkopolskie	350	0,98
12. dolnośląskie	346	0,97
13. mazowieckie	329	0,92
14. małopolskie	327	0,92
15. lubelskie	294	0,83
16. pomorskie	254	0,71

mean 356

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XIII/6

**Voivodships by book purchases (in vols.)
per 100 inhabitants**

	volumes	standard score
1. mazowieckie	9,3	1,34
2. podkarpackie	8,6	1,25
3. lubelskie	8,1	1,18
4. wielkopolskie	7,8	1,13
5. opolskie	7,7	1,12
6. zachodniopomorskie	7,3	1,05
7. dolnośląskie	6,7	0,97
8. śląskie	6,7	0,97
9. świętokrzyskie	6,7	0,97
10. lubuskie	6,5	0,94
11. podlaskie	6,3	0,91
12. warmińsko-mazurskie	6,0	0,87
13. kujawsko-pomorskie	5,9	0,85
14. małopolskie	5,9	0,85
15. łódzkie	5,7	0,82
16. pomorskie	5,4	0,79
mean 6,9		

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XIV

Voivodships by index of library service intensity

	ranking place in prev. year	average stand. score
1. podkarpackie	1	0,76
2. opolskie	2	0,85
3. podlaskie	3	0,87
4. kujawsko-pomorskie	4	0,91
5. lubelskie	5	0,91
6. warmińsko-mazurskie	6	0,92
7. lubuskie	8	0,93

11. łódzkie	10	1,03
12. dolnośląskie	12	1,12
13. mazowieckie	13	1,16
14. pomorskie	14	1,17
15. śląskie	16	1,25
16. małopolskie	15	1,26

Table XIV/1

**Voivodships by number of borrowers
per 1 library or 1 branch**

	borrowers	standard score
1. opolskie	488	0,66
2. podkarpackie	518	0,70
3. świętokrzyskie	606	0,82
4. lubelskie	639	0,86
5. podlaskie	655	0,88
6. kujawsko-pomorskie	685	0,92
7. lubuskie	698	0,94
8. warmińsko-mazurskie	725	0,97
9. zachodniopomorskie	731	0,98
10. łódzkie	740	0,99
11. wielkopolskie	770	1,04
12. dolnośląskie	786	1,06
13. małopolskie	884	1,19
14. pomorskie	922	1,24
15. mazowieckie	967	1,30
16. śląskie	1 084	1,46

mean 744

The standardized index in col. 3 of this table is a quotient of the named value by an arithmetic average value of a given named distribution, calculated for each voivodship.

Table XIV/2

**Voivodships by number of borrowers
per 1 square metre of library space**

	borrowers	standard score
1. zachodniopomorskie	4,0	0,64
2. lubuskie	5,0	0,79
3. opolskie	5,1	0,80
4. podkarpackie	5,4	0,86
5. podlaskie	5,6	0,88
6. warmińsko-mazurskie	5,7	0,90
7. świętokrzyskie	5,9	0,93
8. dolnośląskie	6,0	0,95
9. kujawsko-pomorskie	6,3	1,00
10. wielkopolskie	6,4	1,01
11. łódzkie	6,6	1,04
12. śląskie	7,0	1,10
13. lubelskie	7,2	1,14
14. pomorskie	7,3	1,15
15. mazowieckie	8,2	1,30
16. małopolskie	9,6	1,51
mean 6,3		

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XIV/3

Voivodships by number of borrowers per 1 librarian

	borrowers	standard score
1. podkarpackie	283	0,83
2. opolskie	285	0,83
3. świętokrzyskie	310	0,90
4. podlaskie	313	0,91

15. pomorskie	386	1,42
16. zachodniopomorskie	392	1,44
mean 272		

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XV
Voivodships by index of library service efficiency

	ranking place in prev. year	average stand. score
1. lubuskie	1	1,11
2. śląskie	2	1,11
3. zachodniopomorskie	3	1,11
4. lubelskie	7	1,06
5. małopolskie	4	1,05
6. dolnośląskie	5	1,04
7. opolskie	6	1,04
8. łódzkie	9	1,01
9. wielkopolskie	8	0,99
10. świętokrzyskie	14	0,99
11. warmińsko-mazurskie	10	0,98
12. mazowieckie	12	0,97
13. podkarpackie	13	0,95
14. pomorskie	11	0,94
15. kujawsko-pomorskie	15	0,84
16. podlaskie	16	0,83

Table XV/1

Voivodships by number of borrowers per 100 inhabitants

	borrowers	standard score
1. małopolskie	20,3	1,23
2. śląskie	19,0	1,16
3. mazowieckie	18,2	1,11
4. lubelskie	17,7	1,08
5. lubuskie	17,8	1,08
6. dolnośląskie	17,4	1,06
7. podkarpackie	17,0	1,03
8. łódzkie	16,3	0,99
9. zachodniopomorskie	16,3	0,99
10. wielkopolskie	16,1	0,98
11. warmińsko-mazurskie	16,0	0,98
12. opolskie	15,1	0,92
13. kujawsko-pomorskie	14,7	0,89
14. świętokrzyskie	13,9	0,85
15. pomorskie	13,8	0,84
16. podlaskie	13,4	0,81
mean 16,4		

The standardized index in col. 3 of this table is a quotient of the named value by an arithmetic average value of a given named distribution, calculated for each voivodship.

Table XV/2

Voivodships by number of loans per 100 inhabitants

	loans	standard score
1. śląskie	384	1,21
2. lubelskie	360	1,14
3. dolnośląskie	359	1,13
4. wielkopolskie	341	1,08
5. lubuskie	338	1,07
6. podkarpackie	334	1,06
7. małopolskie	332	1,05
8. łódzkie	317	1,00
9. opolskie	311	0,98
10. warmińsko-mazurskie	309	0,98
11. mazowieckie	300	0,95
12. zachodniopomorskie	298	0,94
13. świętokrzyskie	280	0,88
14. podlaskie	275	0,87
15. kujawsko-pomorskie	273	0,86
16. pomorskie	258	0,81

mean 317

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XV/3

Voivodships by number of loans per 1 registered item

	loans	standard score
1. lubelskie	1,2	1,34
2. śląskie	1,0	1,16
3. pomorskie	1,0	1,15
4. dolnośląskie	1,0	1,14
5. małopolskie	1,0	1,14
6. wielkopolskie	0,9	1,07
7. mazowieckie	0,9	1,02
8. łódzkie	0,9	1,00
9. lubuskie	0,9	0,98
10. warmińsko-mazurskie	0,8	0,96
11. podkarpackie	0,8	0,90
12. świętokrzyskie	0,8	0,90
13. opolskie	0,8	0,87
14. kujawsko-pomorskie	0,7	0,83
15. podlaskie	0,7	0,79
16. zachodniopomorskie	0,7	0,75
		mean 0,9

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XV/4

**Voivodships by number of items consulted in house
per 100 inhabitants**

	in-house use	standard score
1. zachodniopomorskie	160	1,94
2. lubuskie	119	1,44
3. opolskie	114	1,38
4. świętokrzyskie	104	1,26
5. łódzkie	86	1,04
6. warmińsko-mazurskie	83	1,00
7. małopolskie	81	0,99
8. śląskie	79	0,96
9. pomorskie	78	0,94
10. mazowieckie	75	0,91
11. dolnośląskie	65	0,79
12. podkarpackie	60	0,72
13. wielkopolskie	59	0,71
14. lubelskie	56	0,67
15. kujawsko-pomorskie	52	0,63
16. podlaskie	50	0,61
mean 83		

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.

Table XV/5

Voivodships by number of loans per 1 borrower

	loans	standard score
1. wielkopolskie	21,2	1,10
2. dolnośląskie	20,6	1,07
3. opolskie	20,6	1,07
4. podlaskie	20,5	1,06
5. lubelskie	20,3	1,05
6. śląskie	20,2	1,04
7. świętokrzyskie	20,1	1,04
8. podkarpackie	19,7	1,02
9. łódzkie	19,4	1,00
10. warmińsko-mazurskie	19,3	1,00
11. lubuskie	19,0	0,98
12. pomorskie	18,7	0,97
13. kujawsko-pomorskie	18,6	0,96
14. zachodniopomorskie	18,3	0,95
15. mazowieckie	16,5	0,85
16. małopolskie	16,4	0,85

mean 19,3

The standardized index is a quotient of the named index for a given voivodship by the mean distribution of this index.
